

BREEDING SQUARE ORGANICSEEDS.NL AT BIOVAK 2012,

TRADE FAIR FOR SUSTAINABLE AGRICULTURE, NATURE AND FOOD QUALITY

On an attractive and convenient Breeding Square with a large number of companies, many Dutch nurseries and traders in the plant sector show their varieties, which are of great importance to the national and international organic market.

The Dutch nurseries and traders produce organic propagating material including the following crops:

Vegetables (covered and open cultivation): Leaf vegetables, tomatoes, sweet peppers, carrots, beetroots, cabbage crops, cucumbers, pumpkins; **Arable crops:** potatoes, sowing onions, set onions, shallots, garlic, cereals, grasses; **Medicinal herbs;** **Fodder crops;** **Green manuring crops;** **Fruits:** Apples, pears; **Soft fruit;** **Parkland trees and avenue trees;** **Shrubs;** **Ornamental plants:** Tulip bulbs, flowers, garden plants.

Workshops:

We would like to invite you to join the workshops. Especially since both days of the BioVak workshops are scheduled to form new visions in which your participation and input are important. For example on how to get in the future the right varieties at the right farms. In order to obtain the highest yields in balance with nature we need more diversity, possibly even for each farmer his own selection of plant varieties. Plant varieties which are well adapted to the local circumstances and give the best food for the local people. Organicseeds.nl is working on an approach in this field.
